

Fixflo and Reapit

Fixflo

Reapit

Put repetitive admin in the past where it belongs.

If you're putting the same information into different systems, it's time to streamline your efforts and enjoy the advantages of speed and transparency.

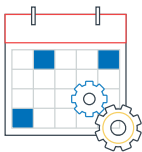

The benefits of the Fixflo and Reapit integration:

Reduce maintenance costs with accurate repair reporting and popups to encourage tenants to fix minor issues without a callout.

Stop back-and-forth when contractors manage their documents, and you can use a single platform for all your communications with stakeholders.

Gain peace of mind when all PPM data is synced in a system, and no Gas Safety Certificate or EICR is ever missed.

Increase speed and accuracy with invoices immediately sent to the correct ledger.

Enjoy transparency with all reports, estimates, work orders, and invoices in one auditable system.

"Fixflo has revolutionised our approach to property management!"

Greg Tsuman MARLA,

Lettings Director, Martyn Gerrard and President, ARLA Propertymark

Introduce your team to the future of repairs & maintenance management and enjoy a new level of efficiency and savings for landlords.
